

BIRDS AND ANIMALS

Look around you and observe the different birds and animals. Pay attention to their postures and manner of movements. First make an outline using a 2B pencil and then apply water colours, keeping in mind the combination of colours of their feathers, hair and other body parts. First apply light tones of colours and then the middle tones of colours. Finally apply dark tones to give depth to the pictures.

BIRDS

Before drawing any bird, you must watch and observe its physical form. A bird is a combination of two ovals. Beaks, eyes, tail, wings, etc. are added to give shape to it.
