

RAINY DAY (POSTER COLOURS)

We all know that when it rains, the wind blows very fast, and with great force. And there is lightning in the sky. Imagine that scene in your mind and how dark was that day.
Take a cartridge sheet, wet it with a sponge and then apply the dark colours like black and Persian blue. Use white colour for the lightning in the sky as shown. Let the colours dry. For the foreground you have to select the colours accordingly what you are going to make. Fill in the details and complete the painting.

ANIMALS

Have you watched animals closely? Observe them and their postures. Drawing hairy animals with a graphite pencil is very interesting. Before sketching, you should practise drawing curved lines using free hand. Using 2B and 4B pencils you can create the same strokes.
